

Children's Upset Tummy Relief

Relieving common tummy troubles

and tips for preventing them

Does your child have an upset tummy due to bloating, gas, or discomfort from acid indigestion or overeating?

Try Children's Mylicon® Tummy Relief for Kids

- Multi-symptom relief for children ages 2-11
- Great-tasting, fast-acting chewable tablets

Tips to prevent upset tummy:

- If your child has had acid indigestion repeatedly, try giving several smaller meals throughout the day instead of 3 large ones
- Avoid high-fat foods
- Teach your child to eat slowly, in a seated position. Rushing can make your child swallow air, which leads to gas that causes bloating and pressure

Use only as directed.

FAQs for Children's Mylicon® Tummy Relief for Kids

Q. When should I use this product for my child?

A. Children's Mylicon® Tummy Relief treats gas, upset tummies, and discomfort from acid indigestion and overeating.

Q. What are the active ingredients?

A. Children's Mylicon® Tummy Relief contains two key ingredients: the #1 doctor recommended anti-gas ingredient, simethicone, and an antacid, calcium carbonate.

Q. How does it work?

A. For fast relief of gas-related discomfort, the anti-gas ingredient gently breaks down air bubbles trapped in your child's stomach and intestines. To relieve heartburn and indigestion, the antacid quickly neutralizes stomach acid.

Q. How is this product different from other children's antacid products?

A. This is a *multi-symptom* formula. Other children's antacids do not address the painful symptoms caused by gas.

Q. Is my child old enough for this product?

A. Children's Mylicon® Tummy Relief is specially formulated for children ages 2 to 11. See the package label for dosing based on age and weight.

Q. Can this product interact with other medications?

A. If your child takes any other medications, you should consult your child's doctor or pharmacist first. This product may interact with certain prescription medicines.

Q. Does Children's Mylicon® Tummy Relief contain nuts, wheat, or gluten?

A. No, it does not contain any peanuts, tree nuts, wheat products, or gluten.

Q. Does it contain lactose, milk, or any milk derivatives?

A. No, it does not contain any dairy or dairy derivative products.

Q. Does it contain preservatives, dyes, or artificial flavors?

A. It uses only preservatives, dyes, and artificial flavors that are safe and approved for use in food and drug products.

Q. Does it contain sugar?

A. It contains small amounts of dextrose and sucralose to help improve flavor.
