

Infants' Digestive Health

Let's talk **probiotics**

What are probiotics?

We often think of bacteria as “bad” and disease-causing. But probiotics are “good” bacteria that, when taken daily, can have health benefits—especially for the digestive and immune systems.

How do probiotics work?

Probiotics can boost the gut's levels of good bacteria to help balance harmful bacteria that may cause digestive problems.

Is my baby too young for probiotics?

No. In fact, infancy may be one of the most important times for probiotics because a healthy microbial balance in the intestines in early infancy is crucial to overall health.

New!

About *Infants' Mylicon® Daily Probiotic Drops*

What kind of probiotic is it?

Featuring one of the world's most studied bacteria strains, **Infants' Mylicon Daily Probiotic Drops** promote healthy digestion, support immune function, and replenish good bacteria that have been depleted through antibiotic use.* Plus, this formulation has been clinically shown to reduce excessive crying and fussiness associated with colic.

How do I give it to my baby?

Give your baby 6 drops daily. You can apply it directly on your nipple, add it to a bottle of formula or breast milk, or dispense it with a spoon.

Does it contain herbal supplements?

No. There are no herbal ingredients in this formulation.

Does it contain gluten or nuts?

No. This probiotic has no wheat, gluten, soybeans, dairy, egg, fish/shellfish, peanuts, or tree nuts. It is a non-GMO product.

Use only as directed.

Infants' Mylicon[®] Daily Probiotic Drops FAQs

Q. How is Mylicon different from other probiotic drops?

A. It is formulated with one of the most researched probiotic strains, *bifidobacterium animalis sub-species lactis*. This probiotic strain has an established history of safety and beneficial use.

Q. Can I use the drops to treat a colicky baby?

A. Yes. When used daily, Mylicon Probiotic Drops have been clinically shown to reduce excessive crying and fussiness associated with colic.

Q. Are Mylicon Probiotic Drops safe?

A. Yes. Mylicon Probiotic Drops are safe when used as directed.

Q. When can my baby start taking the drops?

A. Mylicon Probiotic Drops can be used by newborns and older infants. If your child was born prematurely, consult your pediatrician before use.

Q. What is the dosage?

A. Give your baby 6 drops daily.

Q. How do I give my baby the drops?

A. You can add the drops to a bottle of formula or breast milk, mix them with cool water, dispense them with a spoon, or drop them directly into your baby's mouth. Do not microwave or mix the drops with hot water.

Q. Can I give the drops to my baby if I breastfeed?

A. Yes. You can apply the drops directly to your nipple while breastfeeding.

Q. Can the drops interact with other medications?

A. If your baby takes any other medications, consult your child's doctor or pharmacist before using.

Q. What should I do if my baby gets more than the recommended dose?

A. Please consult your pediatrician if baby received more than 6 drops in one day.

Q. Do Mylicon Probiotic Drops contain nuts, wheat, or gluten?

A. No. They do not contain any peanuts, tree nuts, wheat products, or gluten.

Q. Do they contain lactose, milk, milk derivatives, or any animal by-products?

A. No. While the product does not contain any dairy-derived ingredients, it is produced in a facility that also handles dairy ingredients.

Q. Do they contain dyes or artificial flavors?

A. No. They do not contain any dyes or artificial flavors.

Q. Do they contain sugar or alcohol?

A. No. They do not contain any sugar or alcohol.
